

**PRODUCT DESCRIPTION**

Expansion Caps fit resolutely over the end of a round dowel providing expansion capacity with an internal flute which aligns the dowel and creates the void for the expansion. They can be used on loose dowels or can be used in conjunction with round dowel cradles.

**ADVANTAGES**

- Fits dowel sizes of between 10mm and 50mm in diameter.
- Built in internal fluting that provides for longitudinal expansion.
- Suitable for round dowels
- Dual purpose end cap provides correct alignment during concrete pour.
- Inexpensive alternative to full sleeves

**APPLICATIONS**

- The capping of round dowels of between 10mm and 50mm in diameter thus allowing expansion in concrete joints.

**TECHNICAL DATA**

<b>Suitable for dowel types</b>	Round - galvanized, stainless or black
<b>Dowel size</b>	10mm - 50mm
<b>Material</b>	Polypropylene
<b>Suitable for dowel lengths</b>	Suitable for any length
<b>Cap length</b>	75mm
<b>End expansion</b>	Yes
<b>Lateral Expansion</b>	No
