

PRODUCT DESCRIPTION

Adding top edge capping to a key joint creates a recess or a colour coordinated joint filler. Capping comes in standard 3mm recess, block 10mm recess or permanent Rip-a-Strip capping.

BENEFITS

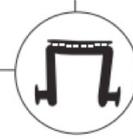

- Temporary or permanent capping
- Creates recess for standard sealants
- Provides a colour coordinated joint filler
- Rip-a-Strip acts as permanent capping

AREAS OF APPLICATION

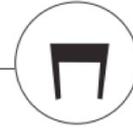

- The adding of a removable or permanent top edge cap to a key joint

Capping is available in the following styles seen above from left to right: Standard (3 mm recess), Block (10 mm recess) and Rip-A-Strip (Permanent capping).

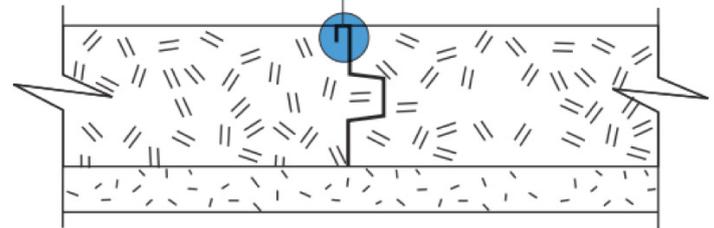

RIP-A-STRIP
Permanent Capping
